Files and Folders Permissions

These permissions are equivalent to the "Full Control" permissions setting.

Data Files Folder - The software application creates files for the purpose of storing cost report data, therefore the User Account must have permission to read, write, create, delete and modify files in a folder you designate as the location of the user data files. The data files folder may be the same or different than the software application installation folder. These permissions are equivalent to the "Full Control" permissions setting.
